RESEARCH INTEREST

My research interests lie in applying AI in healthcare and medical imaging to improve clinical decision support systems. Also, I am interested in the general application of Deep Learning, Machine Learning and Computer Vision. I am looking for any possible PhD opportunities which lie in my research interests in Spring/Fall 2022.

EDUCATION

Multimedia University — Melaka, Malaysia
Bachelor of Computer Science (Hons) Artificial Intelligence — *November 2019 – December 2021*
CGPA: 3.97

Multimedia University — Melaka, Malaysia
Diploma in Information Technology — *July 2017 – October 2019*
CGPA: 4.0

EXPERIENCE

Undergraduate Research Assistant — February – August 2021
Multimedia University — *Melaka, MY*
- Research on predictive modelling
- Investigated different techniques for time-series forecasting

Volunteer Research Assistant — October – November 2020
Multimedia University — *Melaka, MY*
- Worked as a team under supervision of a faculty lecturer
- Applied web crawler for data collection
- Applied rule-based system for DOOH dynamic pricing

Peer Tutor — November 2018 – March 2019
Multimedia University — *Melaka, MY*
- Hold the tutor position for the subject of Mathematical Technique

PROJECTS

Automatic Handwritten Text Recognition for Medical Application | *Deep Learning* — June 2020 – September 2021
- Final Year Project
- Collected the handwritten receipt for model training
- Models trained including: printed/handwritten text identification, OCR and HCR models, and information classification model

Explainable Health Prediction with Transfer Learning | *Deep Learning* — June – November 2020
- Collected the dataset
- Techniques applied in this project included GAN, CNN, Transfer Learning
- Applied various Explainable AI (XAI) techniques as LIME, XAI, IG to get model's explanation in making a decision
- Achieved an accuracy of 0.97 in identifying sick symptoms, where the XAI can provide reasonable explanations in highlighting the corresponding regions

AWS Hackathon Build On Malaysia (Finalist Top 50) | *Python, Git, AWS* — June – September 2020
- Hackathon held by Amazon Web Servies
- Working in a team to build a smart cane prototype for visually impaired group
- Use AWS services for tasks such as Object Recognition, Voice Recognition, Emergency Message

Funtastic Event - Web-based Application | *HTML/CSS, JS, PHP, MySQL* — April – November 2019
- Final Year Project of diploma, a full stack web-based application to enable users to hold an event through the platform
- Grade received: A

MANUSCRIPT

Explainable Health Prediction based on Facial Features using Transfer Learning (Under Review) — 2021

Technical Skills

Languages: Python, C/C++, Java, HTML/CSS, JavaScript, PHP, Laravel, MySQL, CLIPS, LISP, Prolog
Developer Tools: Git, VS Code, Google Cloud Platform, Amazon Web Services
Operating System: Mac, Window
Office and Multimedia Tools: Microsoft Office, Adobe Illustrator, Adobe Premiere Pro
Linguistic: English, Mandarin, Bahasa Malaysia

Award / Certification

Dean List Award: Received for 8 semesters in Multimedia University
Best Diploma Student in Information Technology: Received full scholarship for Bachelor Degree Studies
Huawei Certification: HCIA-AI
Data Science 360: A certification program from LEAD

Volunteer Experience / Leadership

Chinese Cultural Camp | *Secretary*   July – December 2019
- In charge of documentation preparation, checking and approving
- In charge of the application process for renting the necessities from the campus

Orientation Series, CLS | *Assistant Director, Creative and Design Division*   January – September 2019
- In charge of multimedia designs for publicity in Multimedia Unviersity
- Designed the member card of Chinese Language Society for year 2019

Chinese Language Society | *Director, Activity of Recreational Division*   January – November 2018
- Led a group comprised of approximately 30 people to hold an event in the campus
